Professional Summary

Results-driven Scholar Trainee at Wipro with hands-on experience supporting enterprise-level projects, currently pursuing an M.Tech through the Work Integrated Learning Programme at BITS Pilani University. Holds a BCA degree and demonstrates skills in SQL and Python. Gained practical exposure working on the Best Buy account, contributing to testing and data validation. Possesses working knowledge of cloud and data technologies including Google Cloud Platform (GCP), BigQuery, and ETL automation, with a strong foundation in data handling and system optimization. Known for adaptability, continuous learning, and delivering reliable solutions in fast-paced environments.

Work Experience

Developer | Wipro Technologies, Chennai 2025 - Ongoing

Client: Best Buy Account (May 2025- Jan 2026)

- Worked as a Developer helping with DARV4 Migration team, contributing to application testing, data validation, and operational support activities.
- Performed SQL-based data analysis and validation to ensure data accuracy, consistency, and reliability across systems.
- Assisted in testing and automated workflows, ensuring smooth end-to-end data processing.
- Gained hands-on exposure to cloud-based data platforms, including Google Cloud Platform (GCP) and BigQuery, for querying and managing large datasets.
- Supported ETL automation processes, helping streamline data movement and reduce manual intervention.
- Collaborated with cross-functional teams to identify issues, validate fixes, and maintain system stability in a production environment.
- Developed a strong understanding of enterprise data workflows, quality assurance practices, and client-facing delivery standards.

Projects

FIXER (Online Home Services platform)

Final Year Project

An online home services website that connects homeowners with skilled professionals for services such as cleaning, maintenance, and repairs. The platform features a user-friendly interface for easy service booking, real-time scheduling, transparent pricing, and seamless communication between customers and service providers. It enables progress tracking and efficient service management, delivering a reliable and convenient digital solution for end-to-end home service needs.
